TO ALL USERS OF DALLAS PARK IN 2018

Gaston County Parks and Recreation is making improvements to the Dallas Park in 2018. The planned improvements include adding a new splash pad, soccer field, dog park, playground, fitness pavilion, new restrooms, and additional parking.

Construction will take an estimated eight months. The construction is projected to begin in March and it hopefully will be completed by December. During the construction process, the following areas of the park will be impacted:

- Parking areas near Shelters 1 and 2
- Paved trail between Shelter 1 and Animal Control
- Grassy area between Shelter 1 and Animal Control
- Grassy area adjacent to Leisure Lane near Shelter 1
- Amphitheater area
- Tennis Court parking area
- Upper end of lake near Shelter 1
- Parking area near Shelters 3 and 4
- Grassy areas around Shelters 3 and 4
- Grassy area adjacent to Sportsman Lane (on Cotton Gin side of the road)

In addition to these areas being impacted, park users may find that roads and parking areas in the park could be muddy due to grading and the use of heavy equipment. There also could be some disruption to park utilities during the construction process.

We apologize for any inconvenience and disruptions to normal park activities during the construction process. Parks and Recreation staff will make every effort to keep you updated on the construction progress and impacts to your reserved facilities and planned activities. We look forward to providing these new amenities for you.
